

Socket antistatic sterilized

for daily wellness and work

Sanitary clog **VIVOSANO** has been produced to meet the needs of health personnel. Thanks to their versatility, comfort and convenience they are also suitable in all places where hygiene and safety are the key roles for everybody (Operating Theatres, Hospitals, CSSD, Intensive Care, Kitchens, Saunas, Nursering houses, Laboratories, etc..).

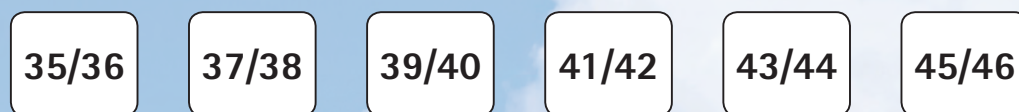

Clogs are made of non-toxic material, thermoplastic polymer; provided with an antistatic insert in the heel; anti-slip sole, washable in manual as well as automatic treatments, fully sterilized at 134°C.

Clogs **VIVOSANO** support the blood circulation and grant the foot perspiration thanks to the anatomical shape and the lateral holes. Each clog can be added by removable anti-bacterial perfumed insole.

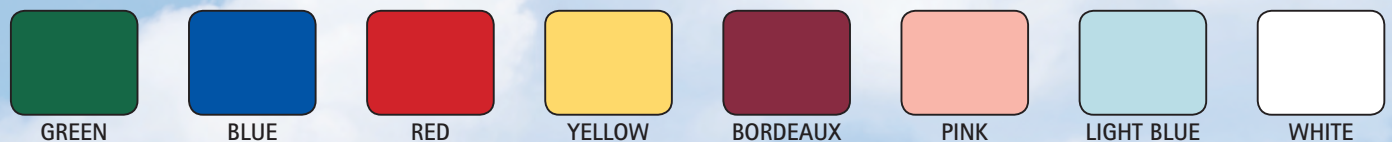

VIVOSANO ensuring comfort to those who work standing for many hours. Available in two different models: with or without back strap.
